

GCM Contractors is committed to protecting the environment in which we work. Our policy is a strategic business tool and supports our corporate philosophy to provide an innovative, compliant and sustainable service to the construction industries.

GCM Contractors aims to reduce the impact of their business on the Environment and to improve quality of life by careful application of the following objectives:

- Meet all necessary legal and regulatory requirements, in so far as they pertain to our business.
- Promote environmental awareness and commitment to the policy amongst all employees through the provision of training, and to encourage suppliers and subcontractors to apply sound environmental principles.
- Avoid the wastage of materials, water and energy by paying careful attention to their use.
- Always seek to use wherever possible, materials from renewable sources and recycled or recyclable materials.
- Minimise pollution and the use of energy, raw materials and waste during construction.
- Improve the landscape, and retain natural features where possible.
- Plan carefully to prevent pollution and minimise environmental disturbance as a result of our activities.
- Ensure compliance with regulations for noise, waste disposal and energy use.
- Constantly monitor environmental management aspects on site in a systematic way and record all environmental issues.
- Reviewing performance against targets and by reviewing objectives.
- Use methods of construction that are sympathetic to the Environment
- Communicate Environmental Policies to all our staff. Make the contents of this policy available to Contractors, Sub-contractors, customers and the Public.

In order to achieve this, company is therefore progressing towards achieving ISO 14001 accreditation of its Environmental Management System.

We further confirm that we will ensure that all activities of the Company together with its suppliers and sub-contractors comply fully with environmental legislation.

This policy statement will be reviewed annually.
